

# Health Assessments and Chronic Disease Management

finding your way through the maze

Is your patient eligible for any HEALTH ASSESSMENTS?

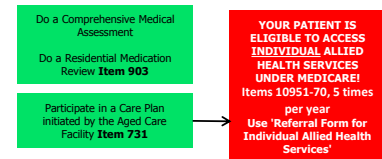

If your patient is found to be at 'high risk' of developing type 2 diabetes, consider referral to a LIFE! Program or Dietitian/Exercise Physiologist for lifestyle modification coaching

1. If your patient is of Aboriginal and/or Torres Strait Islander descent and aged 15-54 years, do an Aboriginal and Torres Strait Islander Health Assessment **Item 715** - use AUSDRISK Tool
2. If your patient is 45-49 years with no diagnosed chronic conditions, do a 45 year Health Check - use AUSDRISK Tool
3. If your patient is 40-49 years, use AUSDRISK Tool to determine diabetes Type 2 risk. If patient is at 'high risk' do a diabetes type 2 risk evaluation.

If your patient resides in an AGED CARE FACILITY...

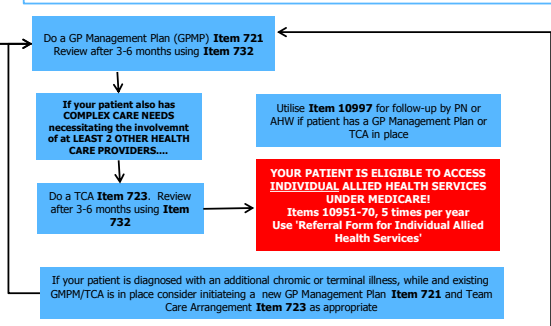

Could your patient benefit from a MEDICATION REVIEW?

If your patient is of ABORIGINAL and/or TORRES STRAIT ISLANDER descent...

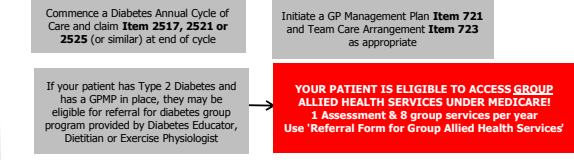

If your patient has a CHRONIC CONDITION that has been or will be in place for six months or has a TERMINAL ILLNESS...

If your patient has a MENTAL HEALTH ISSUE...

If your patient has DIABETES.....

If your patient has moderate to severe ASTHMA....

CASE CONFERENCING...
